### DETAILED ACTION

1. claims 1-122,234-236,239 are pending in the Application.

### Election/ Restriction

- 2 Applicant's election **with traverse** of claims **1-67 and 235** in the communication with the Office on 6/27/2005 is acknowledged.

Because Applicant did not distinctly and specifically point out the supposed error in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)): Applicants have the right to file a divisional, continuation or continuation-in-part application covering the subject matter of the non-elected claims.

The traversal is on the ground(s) that see the election paper. This is not found persuasive For the following reasons:

A/ Applicant has not proved that the assumption by the Examiner that the sub combination has its own utility and the combination does not need the subcombination to be patentable .

B/ applicant assert that the search for the whole class 257 is not a burden for the Office is unpersuasive since class 257 on the USPTO alone involves about more than 300,000 patents and patent publications and the search for this class is more than a burden for the Office.

The requirement is still deemed proper and is therefore made **FINAL** and therefore non-elected claims 68-122,234,236, and 239 are presently not being considered.

3. Claims 1-67,235 are pending in the application.

Claims 1-67,235 directed to semiconductor device assembly are restricted as follows:

4. The claims are directed to the following patently distinct species of the claimed invention:

**Species I.** Claims 1-29 ,235 and as best as can be understood is described in claim 1 is directed to a photo conversion device **without the third doping region.**

**Species II.** Claims 30-67 and as best as can be understood is described in claim 30 is directed to a photo conversion device **with the third doping region.**

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 2818

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
